Drivers Bulletin

Class U and Class S

A reminder....

All Class U and S vehicles are to run nets on both side windows.

For S Class a maximum of 85 liters of fuel for tank capacity

For U Class, no more than the maximum capacity of the standard production below floor fuel tank.

Note: any underfloor tank mods or increase in standard capacity for Class S must fall within the rules

Any questions on either of these points, please refer to the Rule Book or if further explanation is needed, please contact Neville or myself.

Yours sincerely,

Phil Cameron

Chief Steward.
